PREFACE

.....

This publication presents a range of social and housing statistics produced from the 1996 Census of Population and Housing for Queensland and its regions. Together with census population counts, it includes tables of selected census data which describe the characteristics of people living in each area and their housing arrangements. Similar publications are available for each State/Territory, and nationally.

Detailed characteristics from the 1996 Census are being released in two stages. The first release consists of demographic, social and housing data. The second release, comprising family and labour force related data, will be provided progressively State by State from August 1997.

The data presented in this publication relate to where people were enumerated on census night. They should not be confused with the official estimated resident population (ERP) figures, which are derived by including in the census usual residence counts the following:

- estimates of Australians overseas;
- an adjustment for estimated underenumeration; and
- adjustments for births, deaths and migration, between 30 June and 6 August 1996.

Census data presented in this publication represent only a selection of the full range of statistics that could be derived from the census. For further information about other census or ABS data refer to the Appendix — Census Products and Services, or the *Directory of Census Statistics* (Cat. no. 2910.0). Concepts and definitions used in this publication are explained in the Glossary and more detailed information is available in the *Census Dictionary* (Cat. no. 2901.0).

SUMMARY OF FINDINGS

STATE OVERVIEW

The 1996 Census of Population and Housing counted 3,368,850 people in Queensland on census night, 91.7% (3,088,390) of whom were counted at home. This represents a growth of 13.1% (391,040 people) in Queensland's population count since 1991 (2,977,810).

The number of people counted in occupied private dwellings increased by 12.8% since the 1991 Census, from 2,846,169 to 3,211,805. Over the same period, however, the average number of people per occupied private dwelling declined, from an occupancy rate of 2.8 to 2.7 people per dwelling.

AGE

Queensland's population is ageing, with a median age of 33 years in 1996 compared to 32 years in 1991. Just over a fifth (21.9%) of the State's population (excluding overseas visitors) in 1996 were aged 0-14 years, 14.8% were aged 15-24, 30.2% were aged 25-44, 21.1% were aged 45-64 and 12.0% were aged 65 years and over.

BIRTHPLACE

The majority (78.4%) of people counted in Queensland were Australian-born. Of those people born overseas, over half (52.3%) were from the United Kingdom, Ireland or New Zealand. The remaining overseas-born people were predominantly from Germany, Italy, the Netherlands, the Philippines and Viet Nam.

INDIGENOUS ORIGIN

The number of people who reported being of Indigenous origin increased by 36.2% between 1991 and 1996, from 70,124 to 95,516. This represents an increase from 2.4% to 2.8% of the total Queensland population. This increase is partly explained by people's increased willingness to declare their Indigenous origin.

EDUCATION

In 1996, 175,460 people were reported to be attending a Technical or Further Educational Institution, university or other tertiary institution, representing 5.2% of the population.

INCOME

The median weekly personal income for people aged 15 years and over in 1996 was \$286 (approximately \$14,872 p.a.). The corresponding median for 1991 was \$251 (\$13,052).

DWELLINGS

There was a slight decrease between 1991 and 1996 in the proportion of owner-occupied private dwellings. In 1996, 38.7% of occupied private dwellings were owner-occupied, compared to 40.7% in 1991. This decrease was offset by increases in the proportion of dwellings being purchased (from 23.9% to 24.8%) and the proportion being rented (28.5% to 31.8%).

SUMMARY OF FINDINGS *continued*

REGIONAL OVERVIEW

SEX

There were slightly more females than males counted in Queensland on census night (50.3% and 49.7% of the total Queensland population respectively). The highest concentrations of females were located in the Statistical Divisions (SDs) of Brisbane and Moreton (both 51.0%), where most of the population live, and Darling Downs (50.8%). In contrast, males outnumbered females in all other SDs, ranging from 50.9% in Far North to 54.7% in North West.

At the Statistical Subdivision (SSD) level, Toowoomba City (52.7%) recorded the highest proportion of females, followed by Redcliffe City (52.3%), Sunshine Coast (51.6%) and Rockhampton (51.5%). More males than females were recorded in North West (54.7%), South West (53.1%) and Mackay SD Balance (53.0%).

The two Statistical Local Areas (SLAs) recording the highest proportions of females were Nudgee Beach (59.6%) and Chermide (56.1%), where there are several aged persons' homes. Dutton Park, also located within Brisbane SD, recorded 55.3% females.

The highest proportion of males was recorded in the Brisbane SLA of Wacol (68.0%), which contains a military barracks and correctional institutions. The Townsville SLA of Stuart-Roseneath (65.2%), which contains a prison, along with the remote rural SLAs of Bulloo (68.0%) and McKinlay (63.2%) also registered high percentages of males.

AGE

At the SD level, median ages ranged from 30 years in North West to 37 years in Moreton. High proportions of people aged 65 years and over were recorded in Moreton (16.2%) and Wide Bay-Burnett (14.9%), while North West (6.2%) recorded the lowest.

In the south-east corner of the State, between 1991 and 1996 median ages increased by one year in Brisbane, Moreton and Wide Bay-Burnett SDs. However, as examples of more pronounced increases, the median ages for Central West rose from 30 to 34 years, South West 30 to 33 years and North West 27 to 30 years.

The 15 SLAs with the highest median ages were all located in coastal areas such as Gold Coast City Part B and Sunshine Coast SSDs. Coolangatta (60 years), Bilinga (58), Nudgee Beach (53), Caloundra - Caloundra South and Burleigh Heads (both 50) recorded median ages significantly in excess of the State median of 33 years. These SLAs were also noteworthy for having nearly a third or more of all people aged 65 years and over.

BIRTHPLACE

Australian-born

The proportion of people who were born in Australia varied across the State, from 74.3% in Moreton SD to 92.3% in South West SD.

Overseas-born

The highest percentages of overseas-born people were recorded in the SDs of Brisbane (20.3%) and Moreton (19.4%), accounting for 76.8% of Queensland's overseas-born population.

SUMMARY OF FINDINGS *continued*

Overseas-born *continued*

SSDs in the south-east corner of the State recorded the highest proportions of overseas-born people, including Logan City (24.0%), Gold Coast City Part B (23.5%), Brisbane City (21.6%) and Gold Coast City Part A (21.4%).

The highest percentages of overseas-born people were located in SLAs within Brisbane City SSD; including Stretton (53.4%), Darra-Sumner (48.2%), Robertson (38.9%), Richlands (36.7%) and Durack (36.0%).

The highest proportions of people born in the United Kingdom, Ireland or New Zealand were recorded in Coombabah (18.9%), Windaroo-Bannockburn (17.9%), Fortitude Valley - Inner (17.6%) and Helensvale (17.4%). The highest proportions of people born in other countries were recorded in Stretton (47.2%), Darra-Sumner (42.5%), Richlands (31.9%) and Robertson (31.2%).

SPEAKS ANOTHER LANGUAGE AT HOME

Aurukun (86.6%) and Torres (61.7%) SLAs recorded the highest proportions of people aged five years and over who spoke a language other than English at home. These SLAs also recorded high proportions of people of Indigenous origin (88.5% and 79.9% respectively).

Other SLAs recording high percentages of people who spoke another language at home were Stretton (49.9%), Darra-Sumner (49.9%), Richlands (39.5%) and Robertson (31.1%), all located within Brisbane City SSD.

INDIGENOUS ORIGIN

North West SD and Far North SD contained the highest proportions of people reporting to be of Indigenous origin: 20.7% (7,967 people) and 11.0% (25,752), representing increases from 18.8% and 10.7% respectively in 1991.

The increase since 1991 in the numbers of people reporting to be of Indigenous origin was not uniformly distributed across Queensland. The SDs of Moreton and Darling Downs recorded the highest rates of increase in the numbers of people reporting to be of Indigenous origin (increasing by 95.4% and 67.1% respectively), while South West and North West recorded the lowest (15.0% and 8.5% respectively).

SLAs with the highest proportions of people reporting to be of Indigenous origin were Aurukun (88.5%), Mornington (84.8%), Torres (79.9%) and Burke (54.6%).

INCOME

Median weekly personal income levels ranged from \$214 in Wide Bay-Burnett SD, to \$362 in North West SD.

At the SSD level, North West recorded the highest median income (\$362), followed by Cairns City Part A (\$360), Pine Rivers Shire (\$358) and Mackay SD Balance (\$347). The lowest median incomes at the SSD level, were recorded in Wide Bay-Burnett SD Balance (\$209) and Bundaberg (\$230).

The SLA of City - Inner in Brisbane (\$912) recorded the highest median income, which included the responses of the proportionately large number of visitors enumerated on census night at inner city hotels. The mining towns of Cook - Weipa only (\$665) and

SUMMARY OF FINDINGS *continued*

INCOME *continued*

Nebo (\$567) also recorded high incomes. In contrast, Douglas (\$130) in Far North SD recorded the lowest.

TENURE TYPE

Levels of home ownership varied widely across Queensland, ranging from 30.5% in North West SD to 47.6% in Wide Bay-Burnett SD. The highest proportions of owner-occupied dwellings were recorded in the SLAs of Perry (67.3%), Rochedale (63.6%), Bendemere (62.7%) and Chandler (61.6%).

High proportions of dwellings being purchased were generally located on the fringe of Brisbane SD. These included Parkinson-Drewvale (64.6%), Beaudesert Balance (53.5%) and Burpengary-Narangba (51.5%).

North West SD recorded 42.9% rented dwellings, followed by Far North (39.2%) and Mackay (37.0%). At the SLA level, Cook - Weipa only (94.9%), Aurukun (81.5%) and Mornington (80.8%) recorded the highest proportions of rented dwellings in Queensland.

RENT PAYMENTS

The median rent payment for total Queensland increased by 17.9% since 1991, rising from \$106 to \$125 per week in 1996.

The highest median rental payment of \$300 per week was recorded in the SLAs of both Mount Ommaney and City - Inner, within Brisbane City SSD. In contrast, the lowest median rental payments were recorded in Barcoo (\$4), Waggamba (\$14) and Peak Downs (\$15).

HOUSING LOAN REPAYMENTS

Between 1991 and 1996, the median housing loan repayment for the State increased by 47.3%, from \$543 to \$800 per month.

Median housing loan repayment levels ranged from \$557 in Central West SD to \$867 in Far North SD.

The highest housing loan payments were recorded in the SLAs of Brisbane SD, including Pullenvale (\$1,421), Brookfield (including Mount Coot-tha) (\$1,310), City - Inner, Mount Ommaney and Chandler (\$1,300 in each case).

EXPLANATORY NOTES

SCOPE AND COVERAGE

- 1** The 1996 Census of Population and Housing was held on 6 August 1996. The first census was held in 1911 and since 1961 a census has been taken every five years, a frequency which is specified in the *Census and Statistics Act 1905*. The objective of the census is to measure accurately the number and key characteristics of people in Australia on census night, and the dwellings in which they live.
- 2** The census aims to count every person who spent census night in Australia. This includes Australian residents in Antarctica and people in the territories of Jervis Bay, Cocos (Keeling) Islands and Christmas Island. The other Australian External Territories, Norfolk Island and minor islands such as Heard and McDonald Islands, are outside the scope of the Australian Census. The only group of people who spend census night in Australia but are excluded from the census are foreign diplomats and their families.
- 3** The census includes people on vessels in or between Australian ports, on board long distance trains, buses or aircraft and on oil or gas rigs off the Australian coast. People entering Australia before midnight on census night are counted while people leaving an Australian port for an overseas destination before midnight on census night are not. Visitors to Australia are included regardless of how long they have been in the country or how long they plan to stay. However, for people who intend to be in Australia less than six months only basic demographic data are available. The census includes people camping out and the homeless.
- 4** All private dwellings, except diplomatic dwellings, are included in the census, whether occupied or unoccupied. Caravans in caravan parks, manufactured homes in manufactured home estates and self-care units in accommodation for the retired or aged are counted only if occupied. Occupied non-private dwellings, such as hospitals, prisons, hotels, etc. are also included.
- 5** Details about the 1996 Census content, collection operations, confidentiality and privacy protection, processing and evaluation activities are contained in *1996 Census of Population and Housing: Nature and Content of the Census* (Cat. no. 2008.0).

BASIC COMMUNITY PROFILE TABLES B01 TO B16

- 6** Tables numbered B01 to B16 contained in this publication are from the 1996 Census Basic Community Profile (Cat. nos. 2020.0–8). These tables are available in hardcopy or electronic format for all standard census geographic areas. For more information about the Community Profiles please refer to the Appendix.

ABS POPULATION ESTIMATES

- 7** This publication contains population counts based on where people were counted on census night, which may not have been where they usually lived. The census can provide person counts based on place of usual residence at the geographic level of Statistical Local Area (SLA).
- 8** Official ABS population estimates (estimated resident population) are also separately available from the ABS. The estimates are based on census counts that have been adjusted to:
 - include people who were in Australia on census night but were missed in the census;
 - include Australian residents who were temporarily overseas on census night (these people were not within scope of the census); and
 - exclude overseas visitors counted in the census who were not usual residents of Australia.
- 9** The adjusted census count is then updated quarterly using demographic statistics. These are statistics on births, deaths, and overseas and internal migration.

EXPLANATORY NOTES *continued*

ABS POPULATION ESTIMATES *continued*

10 ABS population estimates are published in *Australian Demographic Statistics* (Cat. no. 3101.0), produced quarterly, and in *Estimated Resident Population by Sex and Age: States and Territories of Australia* (Cat. no. 3201.0) produced annually.

11 The ABS also provides projections (based on different assumptions as to future fertility, mortality and migration) of the resident population of Australia, States and Territories. These projections are published biennially in *Projections of the Populations of Australia, States and Territories* (Cat. no. 3222.0).

DATA LIMITATIONS

12 Census data are subject to a number of inaccuracies resulting from errors by respondents or mistakes in collection or processing. Whilst many of these are corrected by careful processing procedures, some still remain. The effect of the remaining errors is generally slight, although it may be more important for small groups in the population. The main kinds of error to keep in mind are:

- *Partial non-response*: In some cases where an answer is not provided to a question an answer is imputed (often from other information on the form). In other cases a 'not stated' code is allocated.
- *Processing error*: While such errors can occur in any processing system, quality management is used continuously to improve the quality of processed data, and to identify and correct data of unacceptable quality.
- *Random adjustment*: Table cells containing small values are randomly adjusted or suppressed to avoid releasing information about particular individuals, families, or households. The effects of these adjustments are statistically insignificant.
- *Respondent error*: Because processing procedures cannot detect or repair all errors made by people in completing the forms, some remain in final data.
- *Undercount*: Although the census aims to count each person, there are some people who are missed and others are counted more than once. The data in this publication are not adjusted for the net undercount.

13 Further information on data quality is provided progressively in *Census Update* and in *1996 Census Data Quality Working Papers*.

OVERSEAS VISITORS

14 Data for overseas visitors (who intend to be in Australia for less than six months) are restricted to age, sex and marital status. In this publication overseas visitors contribute only to the male, female and total person counts.

CALCULATIONS OF PROPORTIONS

15 When calculating the proportion of the population with a particular characteristic, overseas visitors and 'Not stated' responses are included in the denominator. For example, in the Summary of Findings, the *Proportion of Australian-born* was calculated by dividing the number of persons who stated that they were Australian-born by the total population (including overseas visitors and those who did not report their birthplace) and expressing the result as a percentage.

CALCULATION OF MEDIANS

16 A median is a measure of central tendency. It is a mid value which divides a population distribution into two, with half the observations falling below it and half above it. Unlike averages (means) medians are not usually skewed by extreme observations.

EXPLANATORY NOTES *continued*

CALCULATION OF MEDIANS *continued*

17 There are a number of issues to be aware of:

- The categories 'Not stated', 'Overseas visitor', and 'Not applicable' are not included in the calculation of medians.
- If a median falls into a category that has a text only label then the median is set to 0. For this publication this is only relevant to the calculation of median personal income, as the income classification includes categories 'Nil income' and 'Negative income'.
- If the median is calculated on a classification containing ranges and a range is open-ended and the median falls within that category, the median is set to the number in the label. For example, in the calculation of median personal income, if the median falls in the last range \$1,500 or more, \$1,500 is allocated as the median.

UNADJUSTED DOLLARS

18 The 1991 Census dollar values for Median Personal Income, Median Housing Loan Repayments and Median Rent Paid have not been adjusted into 1996 dollars.

SYMBOLS AND OTHER USAGES

19 The following abbreviations and symbols are used in this publication:

General abbreviations and symbols

Mthly	Monthly

APPENDIX — CENSUS PRODUCTS AND SERVICES

There is a wide range of products and services developed from the 1996 Census of Population and Housing, details of which are listed in brief below. For more detailed information on the 1996 Census range of products and services, please refer to the *1996 Census of Population and Housing, Directory of Census Statistics* (Cat. no. 2910.0), or call our Client Services Officers in your State or Territory (refer to the telephone numbers listed on the back page of this publication).

CENSUS REFERENCE PRODUCTS

Census Dictionary

The *Census Dictionary* (Cat. no. 2901.0) is a comprehensive reference guide to the concepts and terms used in the 1996 Census of Population and Housing. It includes a complete listing of the 1996 Census classifications and a glossary of census terms.

How Australia Takes a Census

How Australia Takes a Census (Cat. no. 2903.0) provides information about the history of the census, the planning process and the way in which the census is conducted.

Geographic Classifications and Codes

Statistical Geography: Volume 1 Australian Standard Geographical Classification (ASGC) (Cat. no. 1216.0) provides information about the names and codes of the geographic areas used in the 1996 Census.

1996 Census Statistical Local Area Maps

These reference maps show the Statistical Local Areas (SLAs) from the 1996 Census. Each map shows the boundary of an SLA and the CD boundaries contained within.

Digital Boundaries

All of the census boundaries are available electronically in industry formats through a range of secondary providers.

CENSUS DATA PRODUCTS

Estimated Resident Population (ERP)

The ERP is the official population figure and is based on adjusting the results of the census to provide more accurately the numbers of people usually living in an area.

Two publications containing ERP data, based on 1996 Census figures are:

- *Australian Demographic Statistics — 1996 Census Edition* (Cat. no. 3101.0); and
- *Regional Population Growth, Australia — 1996 Census Edition* (Cat. no. 3218.0).

Selected Characteristics

This series of publications contains data and commentary on various person and dwelling characteristics from the 1996 Census at selected geographic levels. There are three publications in the series:

- *Census of Population and Housing: Selected Social and Housing Characteristics for Statistical Local Areas* (Cat. nos. 2015.0–8);
- *Census of Population and Housing: Selected Social and Housing Characteristics for Urban Centres and Localities* (Cat. nos. 2016.0–8), (indicative release date: January 1998); and

Selected Characteristics *continued*

- *Census of Population and Housing: Selected Family and Labour Force Characteristics for Statistical Local Areas* (Cat. nos. 2017.0–8), (indicative release date: March 1998).

Community Profile Series

The *Community Profile Series* (Cat. nos. 2020.0–8) provides detailed and comprehensive census characteristics of people, families and dwellings for small areas. This series is available for all standard census geographic areas, and is available in hardcopy and electronic formats.

The series comprises six community profiles:

- *Basic Community Profile (BCP)* contains 32 tables of detailed data covering dwelling, household and family topics. This profile is available for all standard census geographic areas, Commonwealth (CED) and State Electoral Divisions (SED), Postal Areas, and Suburbs, for the States/Territories and Australia.
- *Time Series Community Profile* contains 21 tables of variables from the Basic Community Profile comparing data from the 1986, 1991 and 1996 Censuses where the classifications are comparable.
- *Usual Residents Profile* contains 25 tables based on the usual residents of SLAs. This is the only community profile based on place of usual residence.
- *Expanded Community Profile* contains 41 tables available for SLAs and larger areas, comprising more detailed versions of some of the basic profile tables, plus new tables.
- *Working Population Profile* contains 17 tables of labour force and related characteristics of people who work and are counted in SLAs within the journey to work (JTW) study areas — usually capital cities.
- *Summary Indigenous Profile* contains selected characteristics of Indigenous people in two tables which are available at the Indigenous Location level.
- *Detailed Indigenous Profile* contains selected characteristics of Indigenous people in 26 tables which are available for Indigenous Areas, ATSI Regions, States and Territories.

CDATA96

CDATA96 (Cat. nos. 2019.0–8) is a CD-ROM product which provides a large volume of tabulated census data, digital boundaries and base map data. It includes software capable of producing tables, maps and graphs of the data.

KEYDATA

CENSUS KEYDATA (Cat. nos. 2023.0–8) is a CD-ROM product which provides access to 1996 Census Community Profiles and Classification Counts data and Digital Boundaries, using a specially encrypted CD-ROM.

Classification Counts

Classification Counts (Cat. nos. 2022.0–8) provides frequency counts for 1996 Census variables in complete classificatory detail, for every State and capital city.

Census Household Sample File

The *1996 Census Household Sample File* (Cat. no. 2913.0) provides a comprehensive unit record database of census characteristics, containing a sample of private households and associated persons, and persons in non-private dwellings.

Social Atlas Series

The *Social Atlas* (Cat. nos. 2840.1–8) publications feature colour maps of the key social, demographic and economic characteristics of each capital city.

Australia in Profile — A Regional Analysis

Australia in Profile — A Regional Analysis (Cat. no. 2821.0) provides commentary and data on a number of key social indicators from the 1996 Census, with the focus on regional distributions and comparisons.

CONSULTANCY SERVICES

The following census specific services are available:

Thematic Profile Service

The *Thematic Profiles Service* (Cat. nos. 2021.0–8) provides profiles on request, covering the themes of the Family, Young People, Older People and Ethnicity, on a variety of media.

Customised Profile Service

The *Customised Profiles Service* provides community profile data tailored to your needs, on a variety of media.

Customised Tables Service

The *Customised Tables (Matrix) Service* provides detailed cross-classified tables tailored to your needs on a variety of media.

Customised Geographic Data Reports Service

The *Customised Geographic Data Reports Service* provides tabular geographic data which relate specifically to the census Geographic Areas and their characteristics (e.g. area).

Customised Mapping Service

Through the *Customised Mapping Service* you are able to purchase both Customised Thematic Maps and Customised Reference Maps on request.

GLOSSARY

General descriptions of terms and concepts used in this publication are provided below. Tables are also footnoted where applicable for additional clarity. Detailed definitions of classifications and concepts are available in the *1996 Census Dictionary* (Cat. no. 2901.0).

Dwelling A dwelling is a building or structure in which people live. This can be a building, such as a house; part of a building, such as a flat; or it can be a caravan or tent, humpy or park bench. Houses under construction, derelict houses, vacant tents, or converted garages, are not counted in the census.

There are private and non-private dwellings.

A private dwelling is normally a house, flat, part of a house, or even a room; but can also be a house attached to, or rooms above, shops or offices; an occupied caravan or unit in a caravan park or craft in a marina; occupied dwelling in a Manufactured Home Estate; occupied self-care unit in Accommodation for the Retired or Aged; a houseboat; or tent if it is standing on its own block of land. An occupied caravan situated on a residential allotment is also classed as a private dwelling. Private dwellings can be either occupied or unoccupied.

Non-private dwellings are those dwellings not included above, which provide a communal or transitory type of accommodation. These dwellings include hotels, motels, guest houses, prisons, religious and charitable institutions, defence establishments, hospitals and other communal dwellings. Only occupied non-private dwellings are included in the census.

Geographic areas The tables in this publication are at the levels of Statistical Local Area, Statistical Subdivision and Statistical Division, as defined by the 1996 Census edition of the Australian Standard Geographical Classification (ASGC).

Statistical Local Area (SLA): These areas consist of one or more whole Census Collection Districts (CDs) and cover, in aggregate, the whole of Australia without gaps or overlaps.

SLAs correspond in many cases to Local Government Areas (LGAs). The main exceptions are:

- where the boundaries of one or more Statistical Subdivisions (SSDs) cut across an LGA, the LGA is split into two or more parts, each of which forms a separate SLA;
- where a particular LGA is substantially different from other LGAs in terms of size and economic significance, or in terms of user needs for statistics, the LGA may be split into two or more SLAs. For example, the City of Brisbane covers a large area and is split into 163 SLAs while most LGAs in Victoria are split into two or more SLAs following the recent restructuring of local government in that State;
- where an area is unincorporated (i.e. not part of an LGA) an SLA is created.

Local Government Area (LGA): LGAs are spatial units which represent the whole undivided geographic area of responsibility of either:

- an incorporated local government council; or
- an incorporated community government council (CGC) where the CGC is of sufficient size and statistical significance.

LGAs cover only part of Australia. The major areas not covered by LGAs are the large northern parts of South Australia, most of the Northern Territory, and all of the Australian Capital Territory and Other Territories. For the 1996 Census, LGA boundaries are as defined on 5 August 1995 and included in the 1996 Edition of the Australian Standard Geographical Classification (ASGC) (effective 1 July 1996).

Geographic areas *continued*

Statistical Subdivision (SSD): These areas consist of one or more SLAs and cover, in aggregate, the whole of Australia without gaps or overlaps.

Statistical Division (SD): These areas consist of one or more SSDs and cover, in aggregate, the whole of Australia without gaps or overlaps. They do not cross State or Territory boundaries. However, the Other Territories, Jervis Bay Territory and the Territories of Christmas Island and Cocos (Keeling) Islands together form one SD. Capital city SDs are predominantly urban in character and the boundaries are delineated to contain the anticipated urban development of the capital cities (and associated urban centres) for a period of at least 20 years.

SDs outside the capital city are designed to be relatively homogeneous regions characterised by identifiable social and economic links between the inhabitants and the economic units in the region, under the unifying influence of one or more major towns or cities.

State/Territory (STE): States and Territories consist of one or more SDs and are the largest type of spatial unit in the ASGC. The six Australian States and five Territories which are part of geographic Australia and included in the 1996 ASGC are New South Wales, Victoria, Queensland, South Australia, Western Australia, Tasmania, Northern Territory, Australian Capital Territory, Jervis Bay Territory and the external Territories of Christmas Island and Cocos (Keeling) Islands. In the ASGC, Jervis Bay Territory, the Territory of Christmas Island and the Territory of Cocos (Keeling) Islands are combined to form Other Territories (OT).

Codes for State/Territory are as follows:

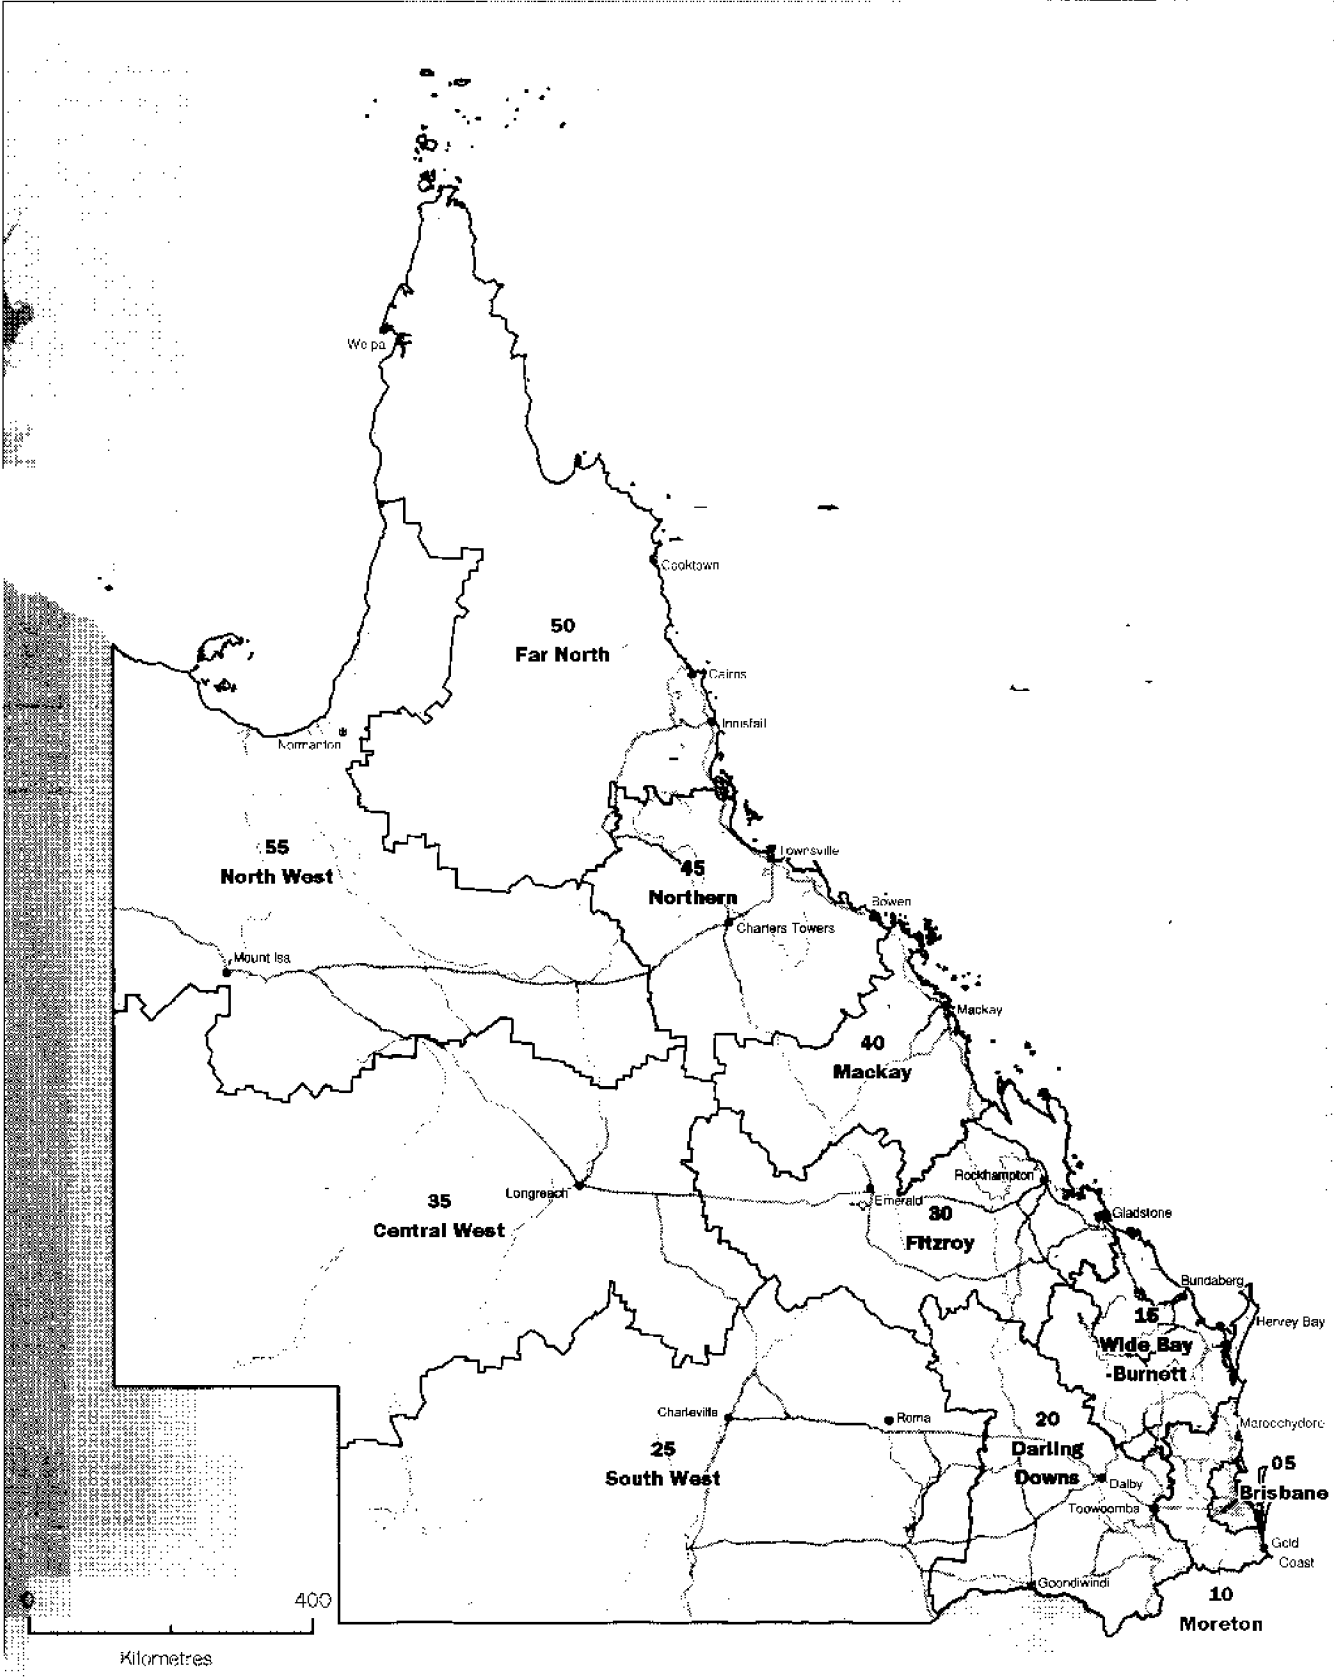

- 1 – New South Wales
- 2 – Victoria
- 3 – Queensland
- 4 – South Australia
- 5 – Western Australia
- 6 – Tasmania
- 7 – Northern Territory
- 8 – Australian Capital Territory
- 9 – Other Territories

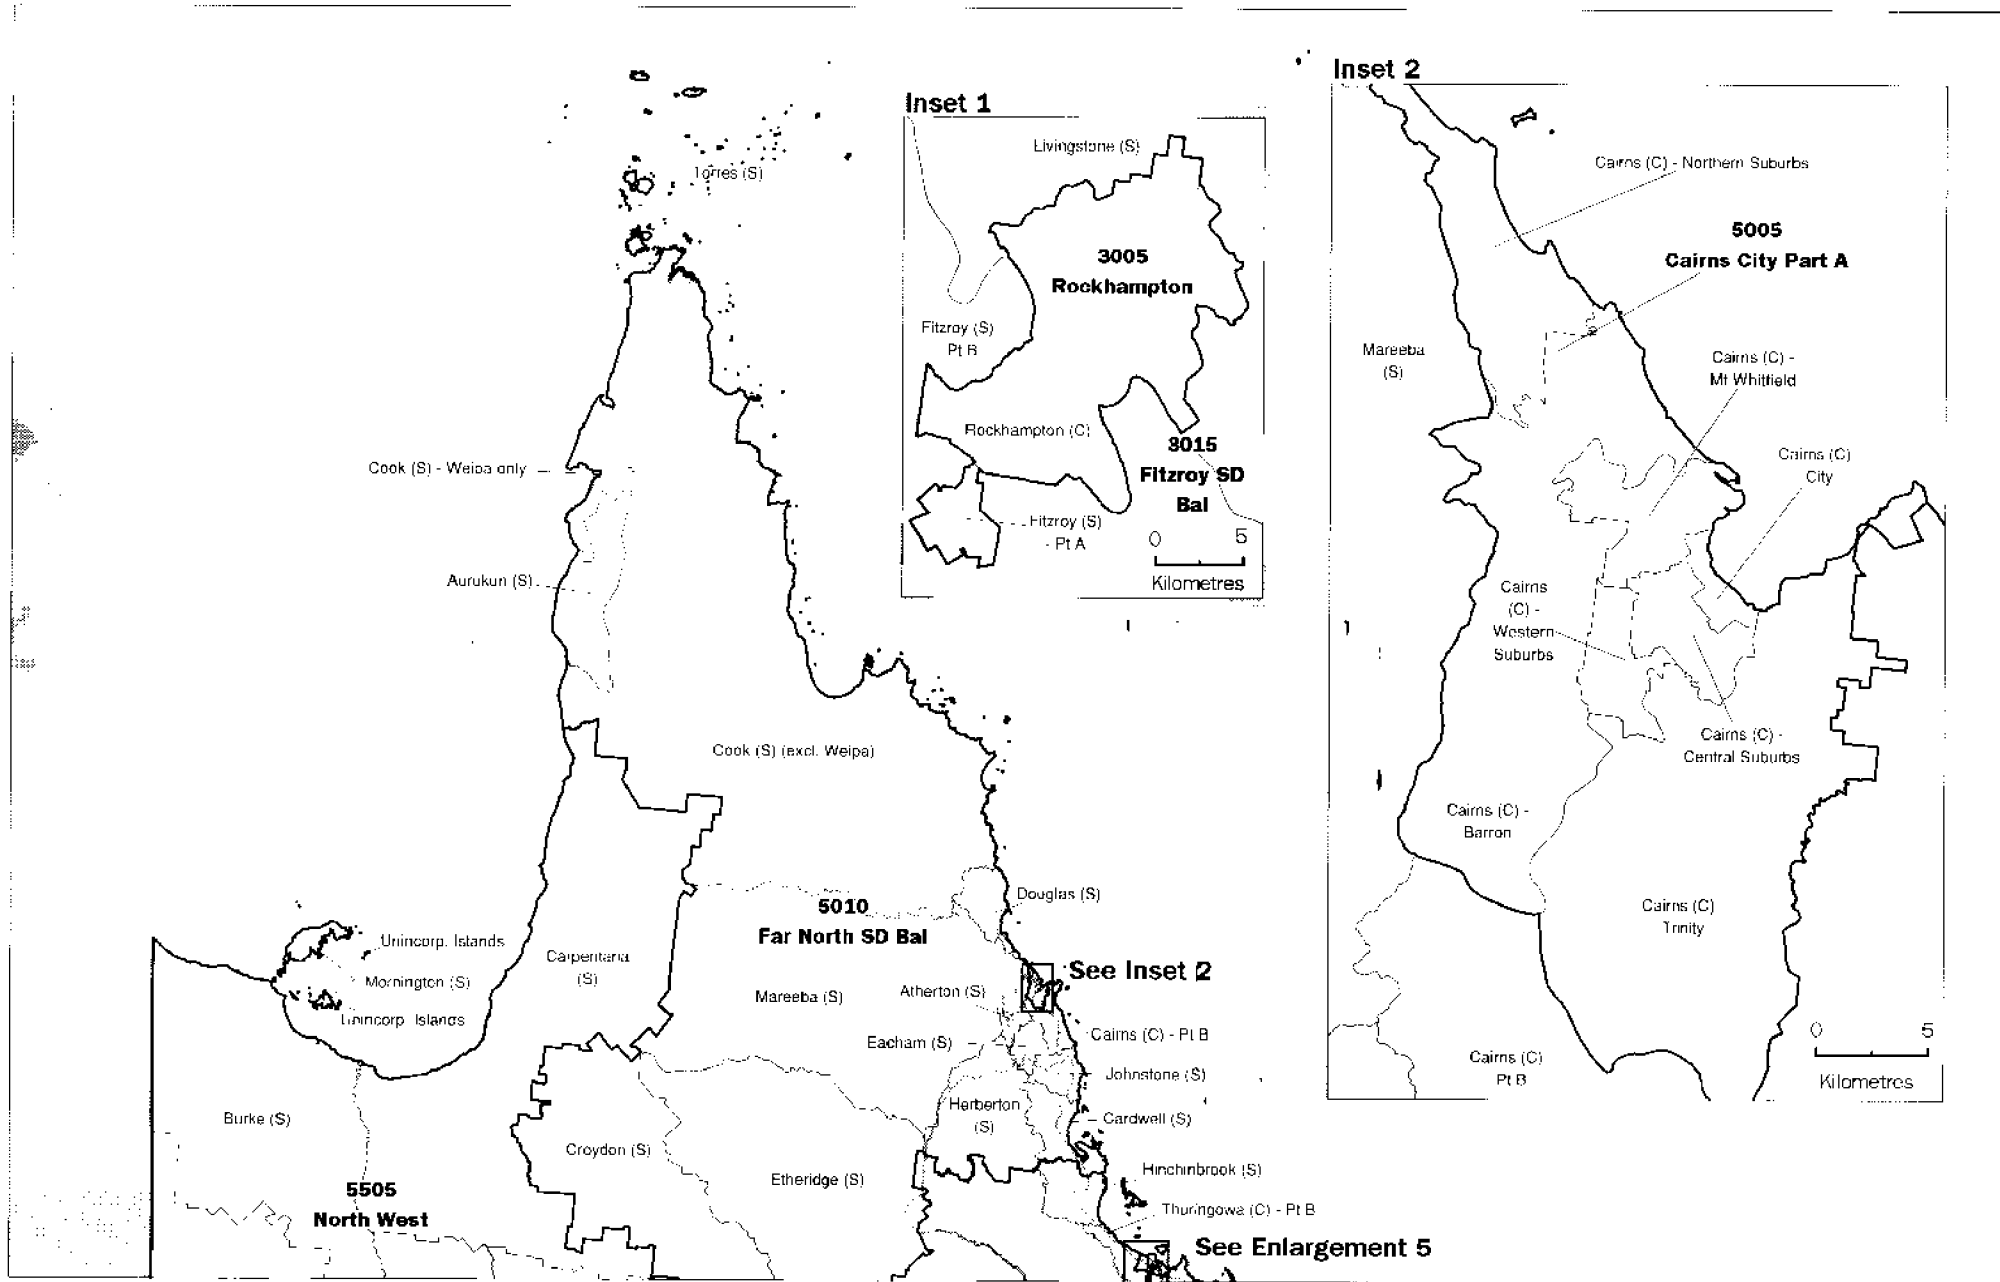

More information about definitions, and lists of codes and names of the geographic areas can be found in *Volume 1: Australian Standard Geographical Classification (ASGC)* (Cat. no. 1216.0) effective date 1 July 1996.

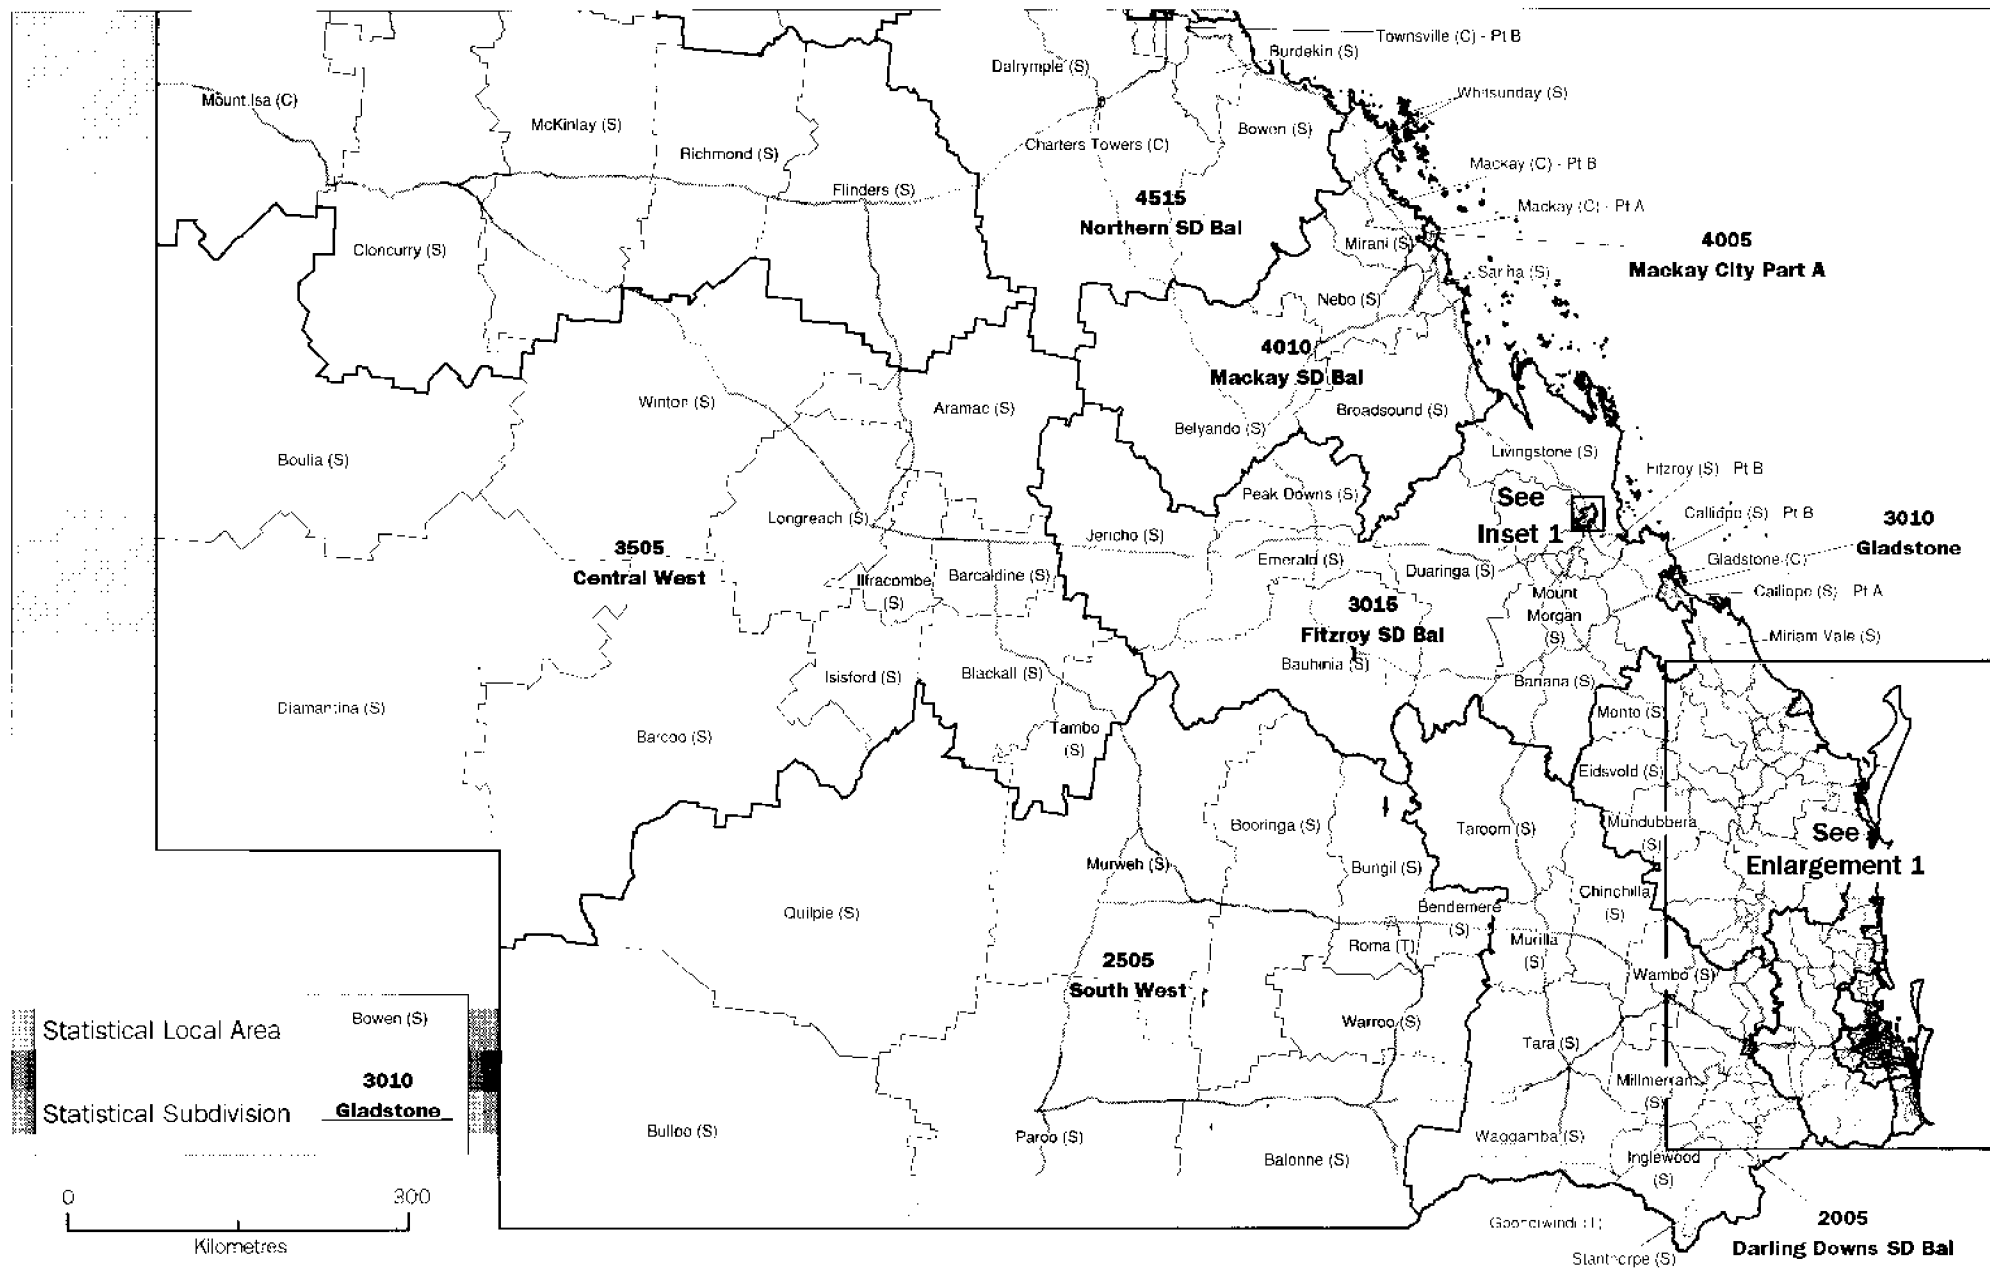

Income People aged 15 years or more are asked to state their usual gross weekly income, which is the income before tax, superannuation, health insurance, or other deductions are made. Gross income includes family allowance, family allowance supplement, pensions, unemployment benefits, student allowances, maintenance (child support), superannuation, wages, salary, overtime, dividends, rents received, interest received, business or farm income (less operation expenses) and worker's compensation received.

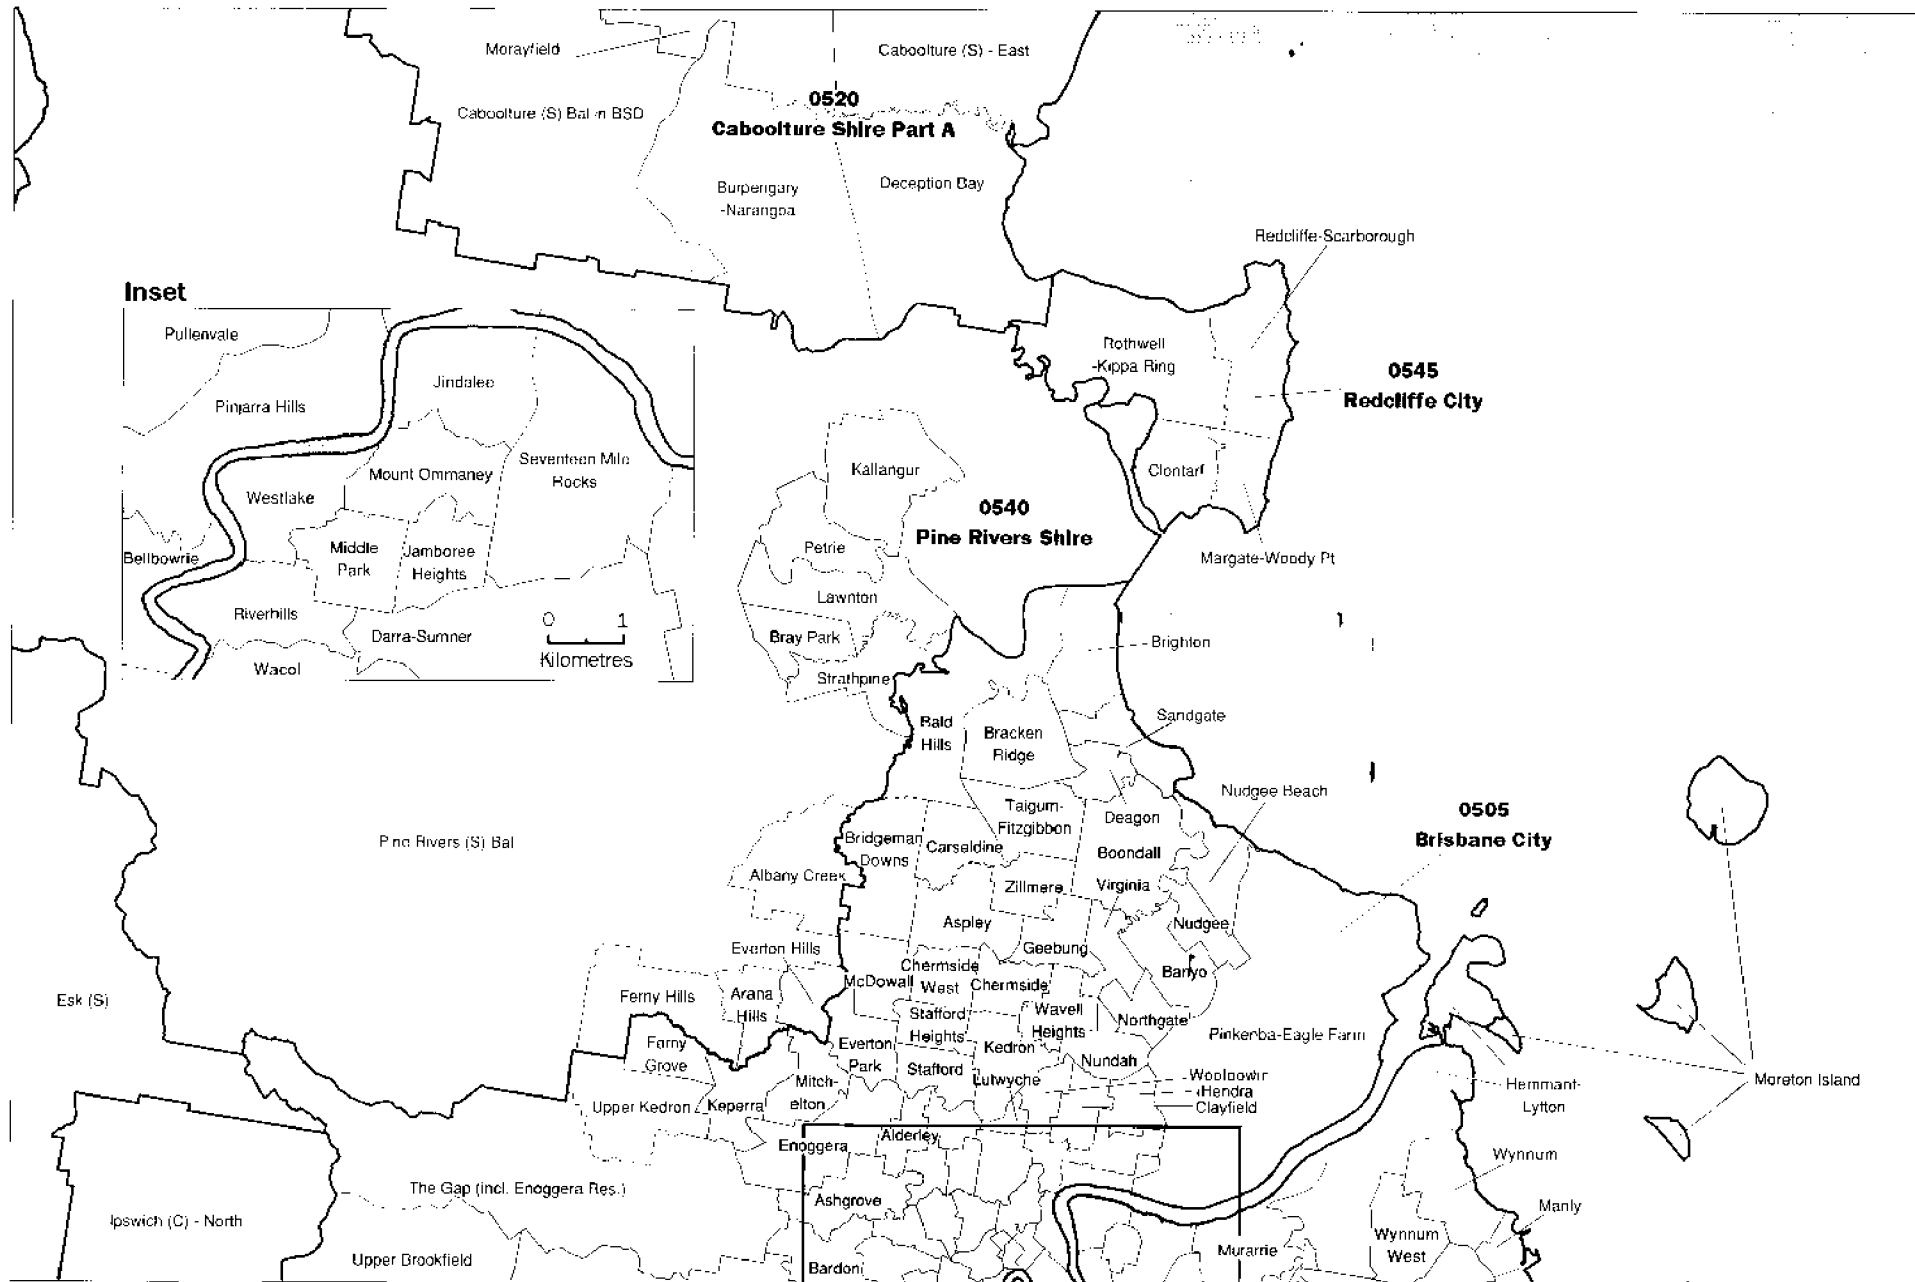

GLOSSARY *continued*

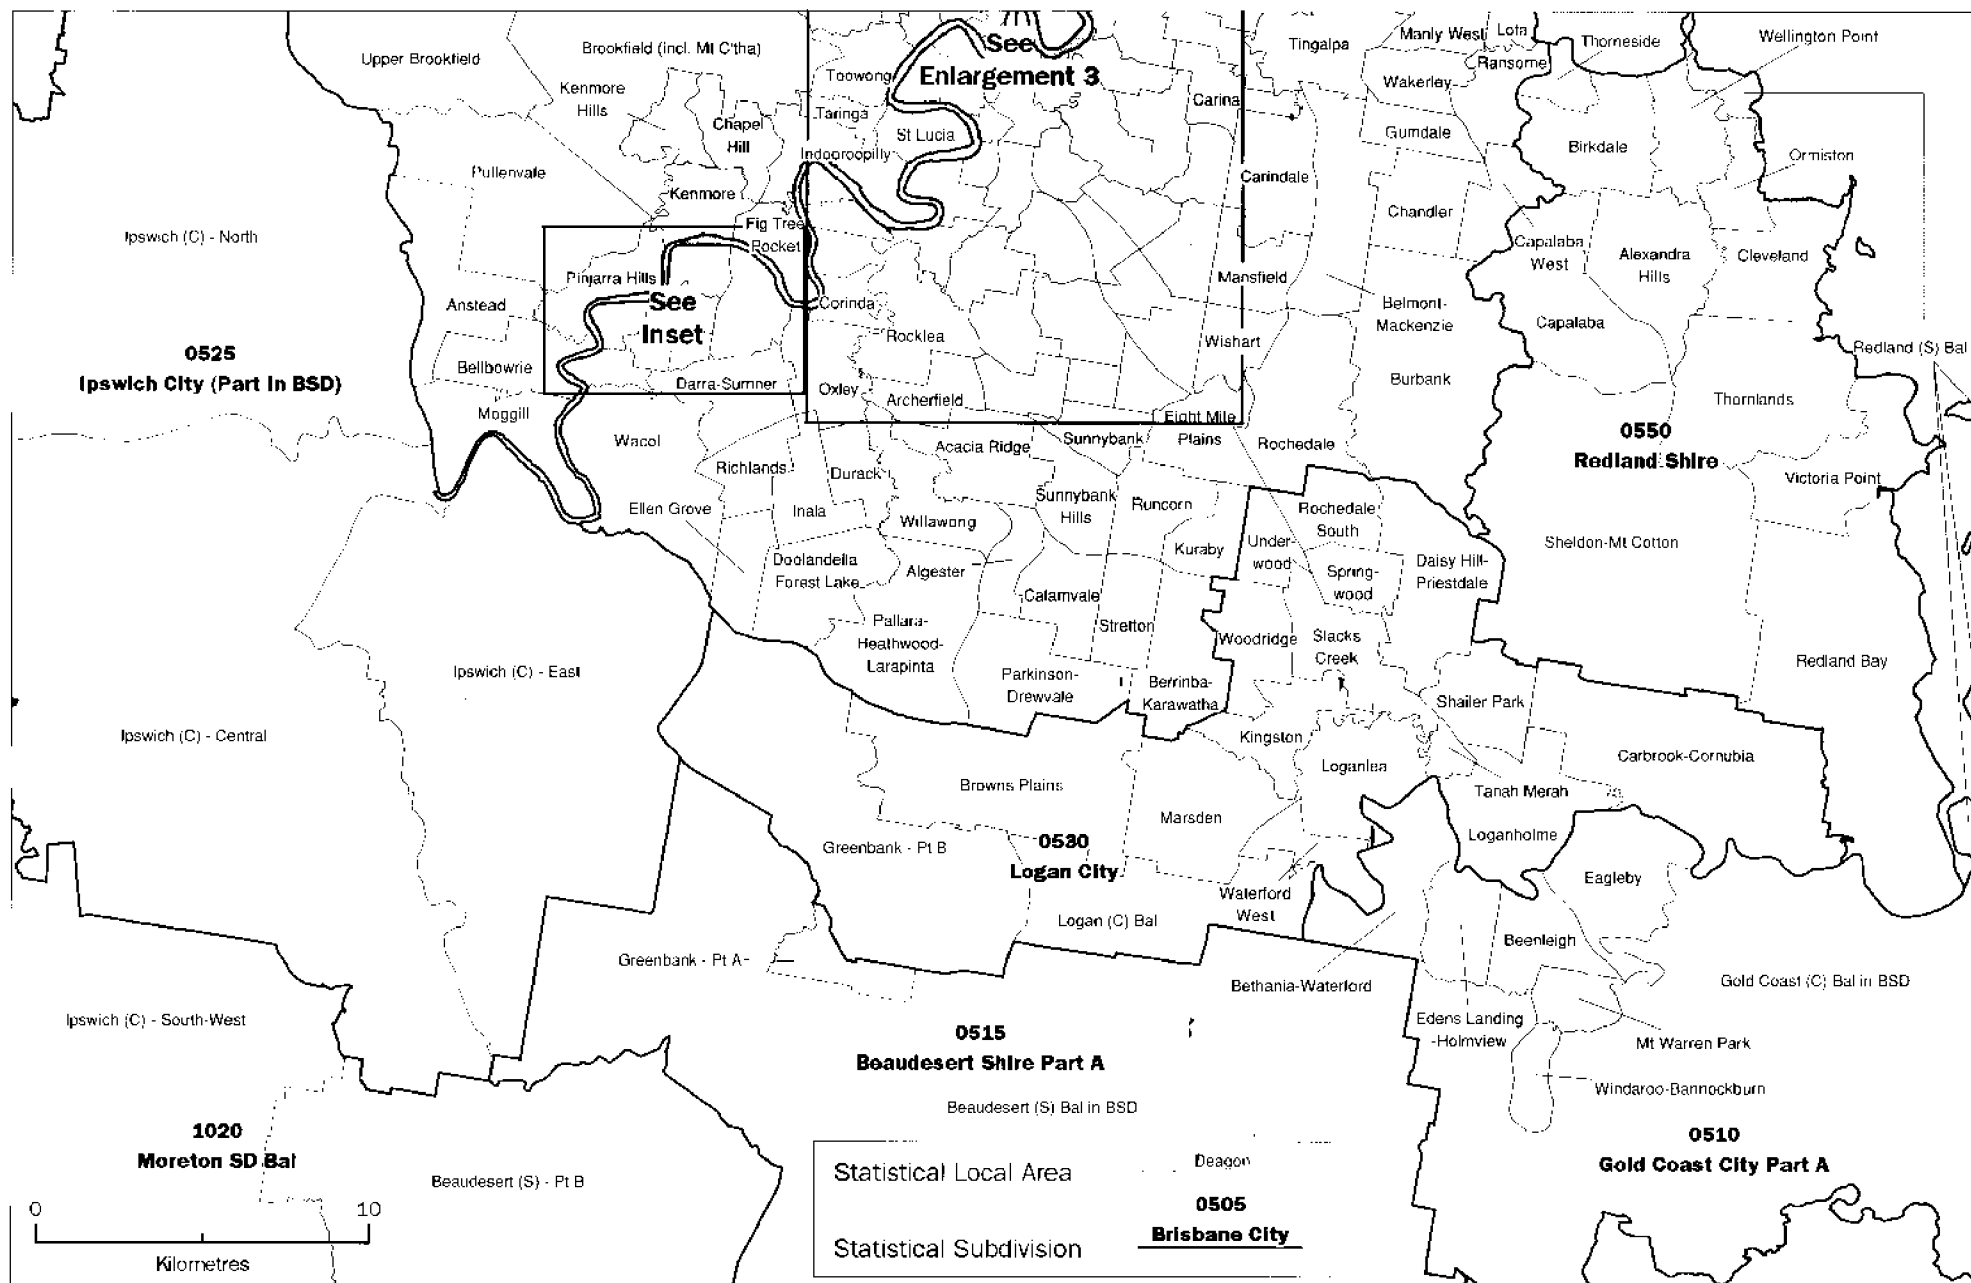

- Indigenous** A person is defined to be of Indigenous origin if he or she identifies himself or herself as of Aboriginal and/or Torres Strait Islander origin.
- Overseas-born** Overseas-born people are those who state that they were born in a country other than Australia, those born at sea, and those whose responses are classed as 'Inadequately described' or 'Not elsewhere classified'.
